About Me

I completed my undergraduate education in Computer Engineering as the top-ranked student of the Faculty of Engineering. Through the Erasmus+ Student Exchange Program, I studied for one semester in Poland, gaining international academic and cultural experience. As a software developer with experience in backend development, I continue to improve myself in line with software development processes and architectural principles. I am actively learning frontend technologies and consciously and sustainably developing my full-stack competencies. With my disciplined work ethic, problem-solving skills, and effectiveness in team projects, I aim to add value to the projects I work on.

Education

Bandırma Onyedi Eylül University

Balıkesir, Türkiye

Faculty of Engineering and Natural Sciences (10/2021 – 06/2025)

- Bachelor of Computer Engineering, GPA: 3,79
- Ranked 1st in Faculty and Department

Czestochowa University of Technology

Częstochowa, Poland

Faculty of Computer Science and Artificial Intelligence (10/2023 – 02/2024)

- Erasmus+ Student Exchange Program

Experience

Full Stack Trainee (.NET, Angular, Oracle SQL)

BilgeAdam Akademi – İstanbul – On-site (10/2025 – 01/2026)

- An intensive and hands-on Full Stack Software Development training focused on .NET & Angular was completed.
- Console projects were developed with C# and .NET; OOP, SOLID, and Clean Code principles were applied.
- Applications were developed using N-Tier and Onion architectures; Hexagonal and Vertical Slice architectures were introduced.
- Design patterns such as Generic Repository Pattern, DTO Pattern, CQRS, and Mediator were implemented.
- RESTful services were developed with ASP.NET Web API. Database operations were performed using Entity Framework Core as the ORM.
- Entity relationships were defined using Fluent API.
- Projects were developed using Swagger, Postman, AutoMapper, and FluentValidation; pagination, filtering, and sorting implementations were performed.
- Relational database design was done using Oracle SQL & PL/SQL.
- Applications were developed in SPA architecture using Angular.
- Practices were carried out in accordance with Agile / Scrum processes.

Backend Developer

Digi360 – İstanbul – Hybrid (02/2025 – 06/2025)

- Designed and developed a scalable and high-performance backend architecture consisting of 7 microservices using Java and Spring Boot technologies.
- Established modular structures in accordance with Clean Architecture principles, including Controller, Service, Repository, and DTO layers, to improve code maintainability.
- Ensured data persistence on PostgreSQL using Spring Data JPA and Hibernate, and optimized CRUD operations and query performance.
- Developed endpoints in line with RESTful API standards to enable inter-service communication and external system integrations, and provided documentation with Swagger/OpenAPI.
- Effectively managed code tracking, branch management, and merge processes using the Git version control system.
- Adopted Agile/Scrum methodologies and actively participated in daily Sprint meetings; contributed to improving code quality through Code Review processes.

Backend Developer Intern

Jotform Yazılım A.Ş. – Remote (08/2024 – 09/2024)

- Designed and developed a dynamic Query Builder system with OpenAI (ChatGPT) API integration and natural language processing (NLP) capabilities using PHP and MVC architecture.
- Applied advanced Prompt Engineering techniques to analyze user inputs and generate SQL queries compatible with the database schema, and visualized the results.
- Built complex query structures on MySQL; implemented chat history management (session handling), context awareness, and intelligent recommendation algorithms on the backend.
- Took full responsibility (100%) for backend development processes, successfully managing API design, database modeling, and server-side logic.
- Worked in coordination with the frontend team in accordance with Agile principles; handled technical integrations and delivered a technical demo to internal stakeholders at the end of the project.

Backend Developer Intern

Mgs Software – Istanbul – Hybrid (07/2023 – 08/2023)

- Built a scalable backend structure using the Laravel framework and MVC (Model-View-Controller) architecture to ensure code manageability and modularity.
- Designed relational data modeling on MySQL; developed optimized CRUD operations and data querying mechanisms.
- Implemented Session Management, Authentication, and secure form handling processes to ensure application security.
- Wrote Unit Test scenarios to improve code quality and system stability; integrated server-side Validation and Pagination structures.
- Improved user experience (UX) with advanced search algorithms and filtering features.

Project

ETicaretAPI (.Net 6) [\(Github Link\)](#)

- Actively developed with .NET Core 6.
- In the project written with Onion architecture, I used Generic Repository Pattern, CQRS–Mediator Pattern, and Azure Storage.
- I used the Identity package and JWT architecture for Authentication and Authorization processes.
- I configured and used the PostgreSQL database on a Docker container.

ETicaretClient (Angular) [\(Github Link\)](#)

- Actively developed with Angular 14. It is the project where I consumed the ETicaretAPI project.
- I designed modular admin and UI layers.
- I used Material UI for the admin part and Bootstrap for the UI part.
- I integrated Toastr and Alertify services to show notifications to the user.
- I added loading animations with Spinner.
- I designed a Directive for the delete operation.

Certificate

BilgeAdam Akademi	Software Development Specialist Training Program	21.01.2026
Udemy	Master Microservices with Spring Boot Cloud And Docker	24.04.2025
BTK Akademi	PHP 8 Web Development	05.08.2024
BTK Akademi	Version Control: Git and GitHub	24.03.2023
BTK Akademi	Learning SQL with Applications	18.03.2023
Bandırma Onyedi Eylül University	English Language Certificate CEFR-B1+ Level	16.12.2022

Additional Information

Technologies Experienced: Java, Spring Boot, C#, ASP .Net Core, Oracle PL/SQL, MsSQL, PostgreSQL, PHP, Laravel, MS Office

Turkish: Mother Tongue, **English:** B1

Driver’s License: Class B

Military Service Status: Completed
